EMUGE 60° and 90° CARBIDE CHAMFER MILLS

Quickly mill linear chamfer angles and create chamfer angles for threaded holes.

Chamfer Mills are multi-functional – used for deburring, chamfering or countersinking. For optimum performance this style tool is used in a milling pass and not as a plunging tool.

- Multi-functional tool
- Suitable for a wide variety of materials
- Ultra-fine grain carbide
- TiAlN coated for wear and heat resistance
- For chamfering edges and threaded hole chamfers
- 60° and 90° chamfer angles
- Straight cylindrical shank ground to an h6 tolerance

Made in USA
